USB 1.1 Extender

This product can help remove the distance barrier between your PC and any USB-enabled peripheral devices which are located at a distance over to 50 meters away. By using technology of ASIC (Application Specific Integrated Circuits) and other ICs plus features of Cat.5 / 5e / 6 cable, distance is no longer a problem to hinder the inter-workability in your computing communication world.

Features:

- Extend USB peripherals up to 100 meters for low-speed devices and 50 meters for full-speed devices.
- Ideal for use with multi-touch monitors , whiteboards , webcams etc.
- Compliant with USB 2.0 & 1.1 specification
- Embedded USB transceivers in both Master and Remote units to secure the transmitting quality
- One LED to indicate the extender is power on
- Bus-powered - no external power supply required for local or remote unit
- No driver installation is required
- Supports Windows 98SE / ME / 2000 / XP / Vista / 7 / 8 / 8.1 / 10; Mac OS 8.6 / 9.x / 10.x or higher

Specification

Model No.			US-102M
Connector	Master	Upstream	15 cm USB cable with USB Type A Male
		Output	RJ45 Female
	Remote	Input	RJ-45 Female
		Downstream Port	USB Type A Female
Interconnection Cable			Standard Cat.5 / 5e / 6
LED			1 LED on each end
Power Mode			Bus
Housing / L x W x H			Molding (PVC) / 32 x 21 x 20 mm
