Operation Mode	Peer to Peer
Cable Length	1.5m
Housing	Plastic

Specification

Installation

System requirements:

Operating system: Windows 7 (32/64bit), 8.1 (32/64bit), 10 (32/64bit), and 11 (32/64bit).

You can also use the USB 3.0 Data Link and KM Switch cable with the provided software to transfer files from one computer to another computer, and control the file directories on both computers at the same time. The software supports file transfer between supported operating systems, including Windows 7, 8.1, 10 and 11.

Starting Windows

 Connect one end of the USB 3.0 Data Link and KM Switch cable to a standard USB port on one of the two computers. And connect the other end of the USB 3.0 Data Link and KM Switch cable to a USB port on the second computer.

- 2. The device will automatically start the Smart KM Link software installation on both computers.
- 3. An option window may appear. Please click on the executive archive "SmartDataLink.exe"

Application Software Instructions

To begin set up, please click USB3 Smart Data Link Utility Icon 🛛 🔀 found in bottom right corner of taskbar.

Note:

If there is one end connected to a USB 2.0 port of the 2 computers, the link icon will show as below figure. That means the operation is working on USB 2.0 specification.

If there is one end failed to link, the SmartDataLink icon appears bottom right corner of taskbar will mark with an [x]

To retrieve link connection, you may remove & plug in both ends of the USB 3.0 Data Link and KM Switch cable. Or go to **My Computer** and double-click the SMARTLINK icon (F:) and then click the executive archive "SmartDataLink.exe".

Hotkey Toggle:	Alt+s			

- a. Select [Turn Off] to disable the Keyboard and Mouse Control Switching Settings
- b. Use Mouse to Move Off the Edge of Screen:
- c. Select [Use mouse move off the edge of screen] to simply move the mouse off the edge of screen.
- d. Use Mouse Middle Button:
- e. Click the middle button of the mouse to switch the keyboard and mouse from one computer to another.

Hotkey

- a. You can setup the hotkey to activate the keyboard control switching.
- b. The default hotkey is (Alt+S)
- c. Move the mouse cursor to the second computer and open any editing application such as Word, Excel, Power Point, etc. and use the keyboard of the first computer to type the text on the file of the second computer.

Note:

- 1-1. Please use a Mouse and Keyboard set. The Keyboard Switch function always follows the mouse cursor of the same computer. When using a USB Mouse or Keyboard that is not a set, it will default to its limited screen switching function mode only.
- 1-2. When the keyboard & mouse is under controlled by other computer, you will see the icon on the bottom right corner of the taskbar.

2. Clipboard sharing

- a. Open a file and select the content (text/pictures) you want from the first computer, right click and select "Copy".
- b. Move the cursor to the location of the 2nd computer to place the Content (text/pictures), and right click and select "Paste"

*When receiving clipboard data from another computer, the SmartDataLink icon appears at the bottom right corner of the taskbar.

- c. Select [Turn Off] to disable the Clipboard Share Options
- d. Select [Auto Share] to activate Clipboard sharing between 2 computers automatically.

Event Notification

You may Activate/Disable [**Play sound**] & [**Popup a Balloon Tip**] according to the menu selections such as a clipboard data is arriving; or to Activate/Disable [**Popup a Balloon Tip**] when a clipboard data is sending.

Activate/Disable [Play Sound] when switch keyboard and mouse control to another computer.

3. File transferring

Drag & Drop

It is an easy and fast way to transfer files between two computers. Just "drag and drop" the file or folder to the other computer.

You can also do the following to transfer files between the two computers.

Copy & Paste:

- a. Right-click on the files that you want to copy and select Copy
- b. Move the cursor to the other computer
- c. Move the cursor to the location that you would like to place the file and Right click, then select **Paste** Hotkeys (Shortcut on Keyboard) :
- a. Click on the files that you would like to copy, and press the (Ctrl+C) Keys from Windows OS computer
- b. Move the cursor to the other computer
- c. Move the cursor to the location that you would like to place the files, and press the (Ctrl+V) Keys to paste the copied

files to another computer.

Note: Please use the original system hotkey settings on your computer operating system (the keyboard always follows the mouse cursor).

4. Others

- a. Select [Resident The Application]: the SmartDataLink will be activated automatically after boot in or restart
 Windows.When you disable this function or remove the USB 3.0 Data Link and KM Switch cable, the SmartDataLink will be Turned Off automatically.
- b. Select [Double Click The System Tray Icon]: double-click the SmartDataLink (b) icon of taskbar, to turn off & disable clipboard sharing & KM sharing temporarily. Double-click the icon again to turn on the SmartDataLink function.

If you have driver install questions or need software instructions, contact your distributor for further support.

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation

WEEE (Waste of Electrical and Electronic Equipment),

Recycling of Electronic Products

In 2006 the European Union introduced regulations (WEEE) for the collection and recycling of all waste electrical and electronic equipment. It is no longer allowable to simply throw away electrical and electronic equipment. Instead, these products must enter the recycling process.

Each individual EU member state has implemented the WEEE regulations into national law in slightly different ways. Please follow your national law when you want to dispose or any electrical or electronic products. More details can be obtained from your national WEEE recycling agency.
